www.berg-group.com

Where you see ice rinks, airplanes, factories, or gas stations, we see the chillers and industrial refrigeration systems that make all that possible.

For over 50 years, Berg has built an international reputation for designing, manufacturing installing, and servicing thousands of industrial thermal process control and industrial refrigeration systems to customers in more than 50 countries worldwide in multiple industries.

Outdoor air-cooled chilling system for a polyethylene production facility

Industries Served:

- Aerospace
- Anodizing & Coatings
- Automotive
- Building & Construction
- Cannabis
- Chemicals & Petrochemicals
- Engineering & Procurement
- Environmental Test Chambers
- Food & Beverage
- Government & National Defence
- Manufacturing
- Marine
- Natural Resources
- Packaging & Printing
- Plastics & Extrusions
- Pharmaceuticals
- Pulp & Paper
- Recreational Sports
- Transportation
- Welding

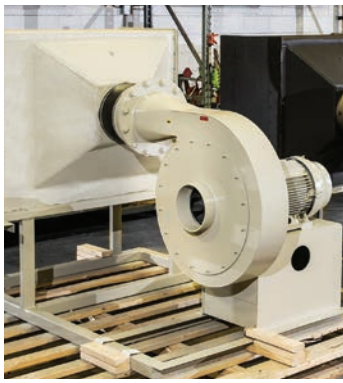

From our Toronto-based, ISO 9001 certified facility, we custom design, manufacture, test and integrate a wide range of skid mounted and factory tested industrial process refrigeration equipment, mechanical packages and fluid pumping systems that precisely meets all functional and economic requirements and challenges.

Berg Marine Chiller Units

Ammonia Indoor Refrigeration System

Blown Film Cooler

Mechanical room

Ammonia Glycol System

Military Vessel Electronics Cooling

4-circuit Air-cooled Indoor Chiller

Outdoor Air-Cooled Chiller

Custom Engineered Solutions for All Your Needs:

Cooling Tower

Ammonia Chiller

Refrigeration System for Oil & Gas Applications

Ammonia Outdoor Chiller

Shell Ice Maker

Water Filtration Unit

Ice Rink Chiller

Closed Pumping System

Temperature Control Unit for Syltherm Fluid (-29C to 200C)

Our Design Difference

Berg's focus on the technical, financial, and environmental priorities of a project, coupled with our flexibility enables us to quickly and easily modify an original design concept in response to customer changes.

Adding or removing refrigeration circuits used for standby or load balancing, or stretching or shrinking a pump tank package to meet a dimensional constraint can be easily managed using our proprietary in-house design tools. The result is always the right solution within budget.

Temperature Control Unit

Here at Berg, safety is our number one priority.

Berg performs all operations and duties in accordance with government and industry standards to keep ourselves on top of all regulatory changes.

Berg understands that unexpected downtime can be disruptive to your operations. That's why we offer round-the-clock support to ensure that any issues that arise are resolved quickly and efficiently. Our experienced technicians are available 24 hours a day, 7 days a week with continual support, to provide emergency repairs, routine maintenance, and system upgrades.
