CHILLING SYSTEMS

Keeping your cool, 24/7

We are standing by 24 hours a day, 7 days a week providing continual access to our well-stocked inventory so we can respond quickly with well-equipped service solutions – a Berg industry exclusive.

Our highly trained professional technicians are ready to support you anywhere we can drive or a plane can fly. Berg's Service Division is Technical Safety and Standards Authority (TSSA) Certified.

Berg Preventative Maintenance Programs:

- Extend Refrigeration system life
- Save time and money
- Maximize peace of mind
- Increase system reliability
- Match service to equipment requirements
- Focus on critical components
- Incorporate root cause analysis
- Reduce specialized staff
- Adjust service as needs change
- Defer capital expenses
- Use OEM parts

The practical maintenance solution

Install a cost-effective Berg preventative maintenance strategy between your business and reliability issues. Protect your investment with a custom maintenance plan delivered by certified technicians. Berg preventative maintenance is the practical maintenance solution. Catch problems before they happen and keep your refrigeration at peak performance.

We service our own factory-built systems and equipment from other suppliers in a wide range of areas:

- Preventative maintenance programs
- Both Freon and ammonia systems
- Emergency unscheduled maintenance
- Training and troubleshooting
- Commercial / industrial HVAC
- PLC modifications and maintenance
- Equipment upgrades and expansion
- OEM parts
- Installation & start-up
