

Project:
Ammonia Air Handling Unit and
Fabric Duct Installation

Client: Agropur
Year: 2020

Solution: New production space
air handling unit and fabric duct
installation for a dairy facility

Features:

- Completion of ammonia piping to a new Engineered Air 100% makeup air unit
- Installation of a new set of SS metal ductwork and fabric material "sock" ductwork inside production space
- Factory testing
- Start-up

Highlights:

-  Custom Engineered
-  Ammonia
-  Factory Tested
-  Mechanical Installation
-  Start-up

Completion of necessary ammonia piping to a new Engineered Air 100% makeup air unit for spot cooling in a dairy facility's production area. Scope of service also included installation of a new set of SS metal ductwork and fabric material "sock" ductwork inside the production space, factory testing, and start-up.
