Project:
Packaged Foods Refrigeration

Client: Pinty's Delicious Foods
Year: 2019

Solution: Ammonia indoor refrigeration system to support a new spiral line freezer for a packaged foods facility

Features:

- System capacity of 244TR at -40°F
- Low-pressure recirculator package
- Two screw compressors (300hp and 400hp)
- One evaporative condenser
- Build-in-place
- Installation and start-up

Highlights:

-  Custom Engineered
-  Ammonia
-  Mechanical Installation
-  Electrical Installation
-  Build in-place
-  Start-up

Build-in-place ammonia indoor refrigeration system to support a new spiral line freezer for a packaged foods facility. The freezer chiller has a system capacity of 244TR at -40°F. Scope of supply included two screw compressors (300hp and 400hp), evaporative condenser, a new low-pressure recirculator package, installation and start-up.
