

Ammonia Refrigeration System Upgrade - Etobicoke

Year: 2019

Solution: Compressor package charged with ammonia to replace outdated compressors

Features:

- Three compressor packages (total of 300 HP) charged with ammonia
- Oil cooling Glycol loop with new pump
- Expansion tank
- Piping modifications as required
- Start-up and commissioning

Highlights:

-  Custom Engineered
-  Ammonia
-  Factory Tested
-  Skid Mounted
-  Start-up
-  Commissioning

Three compressor packages (total of 300 HP) charged with ammonia as a replacement to outdated compressors at an Etobicoke ice rink facility. Scope of supply included an oil cooling Glycol loop with new pump and expansion tank, piping modifications as required, start-up and commissioning.
